## **Foreword**

Between 1996 and 2003 the Federal Republic of Germany has assisted the Government of Tanzania to rehabilitate the Saadani Game Reserve and turn it into a National Park.

During this time we have collected the existing conservation-related literature on the Saadani ecosystem, and a number of additional publications have been produced.

This little bibliography serves the purpose to present these sources in a compiled form for further reference. It is certainly not complete. Due to its importance in pre-colonial and colonial times, the Saadani-Pangani area is extensively covered in the relevant literature of that time and in a number of more recent publications on East African history. All such literature has not been included.
